FLUTED IONIC COLUMNS, FRAME 7 WITH KEYSTONE 3 AND WINDOW CILL 4

DORIC COLUMN 6

This brochure contains many products that could transform your home. All are designed to replicate traditional materials, but are made from more modern materials that are easier to install and maintain.

You will find prices in the accompanying pricelist, or online at www.ukhomeinteriors.co.uk, and if you need any further help please call us on **0121 449 8525**.

Transform your home the easy way, with ukhomeinteriors.

ROMAN COLUMN 27 (LEFT) AND ROMAN COLUMN 24 (RIGHT)

COLUMNS & HALF COLUMNS

The beauty of plaster without the drawbacks.

- Interior or exterior use – water/humidity resistant.
- Beautiful plaster effect finish – not rough or pitted like other materials.
- Suitable for DIY – light enough to be easily handled and installed in a fraction of the time.
- Durable & shock resistant - not brittle and prone to damage like plaster.
- Pre-primed surface requires only one coat of paint.

PILASTERS

The beauty of plaster without the drawbacks.
Beats GRP, too.

- Interior or exterior use - water/humidity resistant.
- Beautiful plaster effect finish – not rough or pitted like other materials.
- Suitable for DIY – light enough to be easily handled and installed in a fraction of the time.
- Durable & shock resistant – not brittle and prone to damage like plaster & GRP.
- Pre-primed surface requires only one coat of paint.

Pilaster 1

Max. height: 288.5cm
Dimensions
(height x max width x max depth)
Capital: 35.5cm x 43cm x 9cm
Shaft: 200cm x 27cm x 2.5cm
Base: 53cm x 39cm x 7cm

Pilaster 3

Max. height: 269cm
Dimensions
(height x max width x max depth)
Capital: 15cm x 23cm x 6cm
Shaft: 200cm x 13.5cm x 2cm
Base: 54cm x 18.5cm x 4cm

YOUR QUESTIONS ANSWERED...

WHAT ARE YOUR COLUMNS MADE FROM?

Most components are made from high density polyurethane (although shafts on Tuscan and Ionic ranges are made from a polymer and GRP mix). It looks like plaster. However, it is much more easy to install and maintain than plaster as it is lightweight and not as brittle making it easier to manoeuvre and less likely to be damaged. It is also pre-primed to require just one coat of paint, whereas plaster soaks up several.

ARE YOUR COLUMNS LOAD BEARING?

No, but this is easily resolved if you have a load bearing requirement by using a structural support, like a steel. You would then generally wrap two half columns around this post, using filler to disguise the seam. (With each product we show the minimum internal diameter of the column. Deduct 5mm from this figure to allow for tolerance and you have the maximum measurement that can be accommodated for any support structure).

WHAT SIZE WILL I NEED?

There are 2 dimensions to establish:

The height. We give maximum and minimum height dimensions next to each column in this brochure.

The minimum inner diameter. You only need this if you are using the columns in conjunction with a structural support (see 'Are your columns load bearing?' above).

HOW CAN I ADJUST THE HEIGHT?

For each column we show both the maximum and the minimum heights achievable next to the image of the product.

Some columns can be adjusted by removing material from their base component.

All columns can be adjusted by cutting material away from the shaft component. The amount of material that can be removed can be limited if the shaft tapers, as many of them do from about a third of the way up.

SHOULD I FILL THEM WITH CONCRETE?

No.

HOW DO I INSTALL AND FINISH THEM?

Relatively straightforwardly. You will find full instructions on the installation page on our website. Finish with a coat of paint.

ADHESIVES GUIDE

FOR COLUMNS 1-35:

There are three adhesives, from which you will require two for any installation. These are Fix Pro, Fix Extra and Fix Hydro (also called Fix Power). They are used as follows:

Full Columns: Use Fix Extra to join capital to shaft and shaft to plinth. Then use Fix Pro to join the capital to the ceiling and the plinth to the floor and as a filler if required. For external or wet or humid internal installations replace Fix Pro with Fix Hydro.

Coverages are Fix Pro (310ml tube) per 1.5 columns or Fix Hydro (290ml tube) per 1 column + Fix Extra (80ml tube) per 4 columns.

Joining two Half Columns to install as a Full Column:

Use Fix Extra to join capital to shaft, shaft to plinth and one half to another. Then use Fix Pro to join the capital to the ceiling and the plinth to the floor and as a filler if required. For external or wet or humid internal installations replace Fix Pro with Fix Hydro.

Coverages are Fix Pro (310ml tube) per 1.5 columns or Fix Hydro (290ml tube) per 1 column + Fix Extra (80ml tube) per 1 column.

Half Columns: Use Fix Extra to join capital to shaft and shaft to plinth. Then use Fix Pro to join the capital to the ceiling and the plinth to the floor and as a filler if required. For external or wet or humid internal installations replace Fix Pro with Fix Hydro. Coverages are Fix Pro (310ml tube) per 1 half column or Fix Hydro (290ml tube) per 1 half column + Fix Extra (80ml tube) per 8 half columns.

FOR COLUMNS 36-53:

All permutations: Use Decorgrip Plus for all areas. For a full column you will need 1 tube. For joining 2 half columns together 1.5 tubes per column. For mounting a half column against a wall you will need 1.5 tubes per half column.

FOR PILASTERS:

Use Fix Extra to join capital to shaft and shaft to plinth. Then use Fix Pro to join the capital to the ceiling, the plinth to the floor, all components to the wall and as a filler if required. For wet or humid areas replace Fix Pro with Fix Hydro. Coverages are 1 x Fix Pro (310ml tube) or Fix Hydro (290ml tube) per pilaster + Fix Extra (80ml tube) per 8 pilasters.

DENTILS

- Beats wood and brick for strength, durability and ease of installation.
- Beats GRP for ease of installation.
- Pre-finished with white (RAL 9003)
- except Dentils 2 & 3), automotive, maintenance-free paint – no yellowing.
- Can be painted if required.
- Easy installation for refurb or new build.

EASY INSTALLATION

Dentils 2 & 3 are installed simply using adhesive. All other dentils have a wooden block inside it that fits up to the soffit.

For new build, where you have access to the top of the soffit before the roof is installed, drill down through the soffit into the wooden section and screw.

For refurb, when you do not have access to the top of the soffit, simply detach the wooden block from inside the dentil. Screw this block up into the soffit then fit the dentil back over the block and screw it into position from the sides, into the wooden block.

Dentil 1

Height: 7.5cm, Width: 15.5cm, Projection: 17.5cm

Dentil 2

Height: 10cm, Width: 7.8cm, Projection: 20cm

Dentil 3

Dentil 4

Height: 12.3cm, Width: 7.7cm, Projection: 35cm

Dentil 5

Height: 13.5cm, Width: 10cm, Projection: 25.5cm

Dentil 6

Height: 25cm, Width: 7.7cm, Projection: 20cm

DENTIL 4

DENTIL 2

EXTERIOR CORNICE

- Durable.
- Lightweight.
- Pre-finished options use a white (RAL 9003), automotive, maintenance-free paint that is resistant to yellowing (but can be painted if required).
- Unfinished options pre-primed to require just one coat of paint.
- Fast installation using mitred joints and adhesives (alternatively screws can be used).

Please note: With the exception of Exterior Cornice 4, all other 'pre-finished' options are available in the cheaper 'unfinished' range.

EASY INSTALLATION

Whilst you can use screws, the quickest and easiest way is to use our adhesives. Use Fix Hydro to install to wall and soffit, and Fix Extra for joints.

PRE-FINISHED CORNICE

Exterior Cornice 2 (2m) (small - ideal for dormers)

Height: 6.5cm, Projection: 5.5cm

Exterior Cornice 8 (2m) (large)

Height: 21.5cm, Projection: 20cm

Exterior Cornice 9 (2m) (large)

Height: 23cm, Projection: 11.5cm

Exterior Cornice 10 (2m) (large)

Height: 23cm, Projection: 11.5cm

Exterior Cornice 4 (2.438m) (large)

Height: 16.5cm, Projection: 20cm

Exterior Cornice 7 (2m) (large)

Height: 21.5cm, Projection: 16cm
or Height: 16cm, Projection: 21.5cm

Easy Way Option For Exterior Cornice 4

Whilst exterior cornice 4 can be mitred in the usual way, these 'invisible join' corner pieces can make the job easier still. 90 degree and 135 degree internal and external corners, and left and right end caps are available.

Outer corner
90 degree

Inner corner
90 degree

UNFINISHED CORNICE

Flexible options: Some profiles are also available in a flexible material that can bend to a concave or convex wall shape. When available a minimum radius (the tightest curve they will bend to) is shown under the product dimensions.

Premier Cornice 32 (2m)

Height: 4cm, Projection: 5cm
Flexible option min. radius 1.3m

Horizontal Height: 13.5cm, Projection: 25.5cm

Premier Cornice 39 (2m)

Height: 27cm, Projection: 26cm

PREMIER RAILING, FROM OUR INTERIOR RANGE, CAN ALSO BE USED EXTERNALLY. HERE PREMIER CORNICE 11 IS USED AT THE TOP OF THE FASCIA, BUT ALSO PREMIER RAILING 22 AT THE BOTTOM OF THE FASCIA. PREMIER RAILING 19 IS ALSO USED BETWEEN THE SMALLER AND LARGER WINDOWS. SEE WEBSITE OR INTERIOR BROCHURE FOR DETAILS.

CO-POLYMER CORNICE

- Lightweight, durable material (similar to PVC).
- UV stabilised so won't fade and never needs painting.
- Maintenance free.
- All fixings supplied and fixing points covered by snap on covers.
- Corner and end caps for a perfect finish.

EASY INSTALLATION

These products are lightweight which makes for an easy installation and fixings are included. Simply screw through the guide holes and snap corners on for a perfect finish.

Scalloped Co-polymer Cornice

Height: 172mm
Projection: 78mm
Length 1220mm
NB: Sold in boxes of 8 lengths making 9760mm (32ft)

Dentil Co-polymer Cornice

Height: 172mm
Projection: 78mm
Length 1220mm
NB: Sold in boxes of 8 lengths making 9760mm (32ft)

GALLOWS BRACKETS

- Beautiful woodgrain finish (except bracket 1).
- Can be painted if required.
- Pre-finished in white (RAL 9003) – no need to paint.
- Brackets 2, 3 and 4 are load bearing.

EASY INSTALLATION

Brackets 2, 3 and 4 are simply screwed into position. 4 guide holes are marked for your ease. For the perfect finish use polytop screws (screws not provided).

Bracket 1 is simply screwed into position through the front of the bracket.

Bracket 1

Height: 35cm
Width: 8cm
Projection: 39cm
Load: None

Bracket 4

Height: 49cm
Width: 7cm
Projection: 40cm
Load: 35kg
(when evenly distributed)

Bracket 2

Height: 63cm
Width: 7cm
Projection: 58cm
Load: 75kg
(when evenly distributed)

Bracket 3

Height: 74.5cm
Width: 5cm
Projection: 77cm
Load: 75kg
(when evenly distributed)

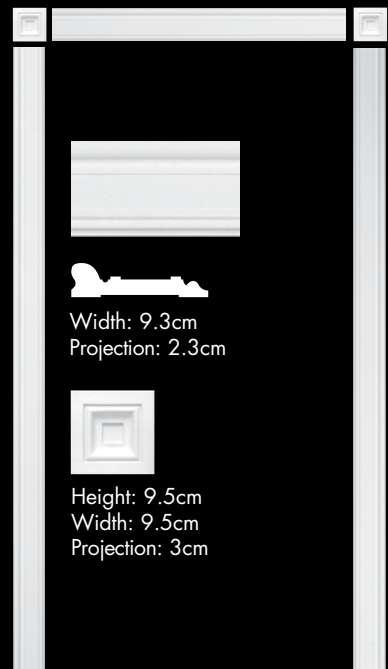

DOOR SURROUNDS

- Lighter, more durable and easier to fit than wood or plaster.
- Pre-primed surface requires just one coat of paint.
- Clean, crisp detailing.
- Durable and shock resistant.

EASY INSTALLATION

The quickest and easiest way to install is to use our adhesives. Use Fix Hydro to mount to the wall, and Fix Extra on any joints. You can use mechanical fixings should you wish.

Door Surround 1

Inner width: 95cm

For taller or wider doors simply purchase additional lengths of architrave or pediments.

EXTERIOR WALL PLANKS

The beauty of antique oak without the drawbacks.

- Perfect for mock Tudor and all types of exterior wall planking effects.
- Unlike wood, will not 'move' after installation.
- Weather resistant.
- Authentic 'hand hewn' effect mouldings.
- Handfinished in a variety of finish options.
- Lightweight and easy to install.
- Durable and shock resistant.
- Mock oak pegs available for added authenticity.

Allow 28 days for delivery. Please note that sizes may vary minimally from those shown.

EASY INSTALLATION

Simply fix with nails and adhesives, or use screws. Cut stop ends for any exposed ends. Use mock oak pegs to cover nail/screw heads.

8" Plank

4" Plank
Length: 3000mm Width: 100mm Depth: 15mm

3" Plank
Length: 3000mm Width: 75mm Depth: 15mm

FINISH OPTIONS

These planks are hand finished to best replicate the antiqued look of old oak. Please note that the stain finishes authentically fade over time, for example the picture shown bottom left shows Jacobean Oak on one installation after around 10 years.

The finish options are:

- Unfinished. This allows you to paint to match your decor should you wish. We deduct 5% from our list prices for this option.
- 3 lighter oak options: Light Oak, Mellow Oak, and Limed Oak. Add 5% to our list price.
- Black. Most commonly used for exterior mock tudor planking. Add 5% to our list price.
- Mahogany. Add 5% to our list price.
- Stain to match a sample that you supply. Add 10% to our list price.

Limed Oak

Mellow Oak

Light Oak

Mahogany

Jacobean Oak

Black

STONE EFFECT FEATURES

- Sandstone effect texture.
- Decorative only – easy face fix.
- Lightweight but durable.
- Pre-primed surface requires just one coat of paint.
- Roughened gluing surface for better adhesion.
- Easy to cut.
- Weather resistant (10 year manufacturers warranty).

EASY INSTALLATION

These products are lightweight which makes for an easy installation using our Hybrid Adhesive (see website for coverage figures and full installation instructions). Alternatively mechanical fixings can be used, and are indeed recommended for larger mouldings.

Top Width: 20cm
Base Width: 11cm
Top Projection: 5cm
Base Projection: 3cm

PLASTER EFFECT FEATURES

- Plaster effect texture.
- Pre-primed surface requires just one coat of paint.
- Decorative only – easy face fix.
- Easy to cut.
- Lightweight but durable.
- Weather resistant.

EASY INSTALLATION

Whilst you can use screws (polytop recommended – not supplied), the quickest and easiest way is to use our adhesives. Use Fix Hydro to install to wall (1 x 290ml tube per 8m) and Fix Extra for joints (1 x 80ml tube per 40 joints).
